EDUCATION

Cornell University

Ithaca, NY

Master of Engineering in Systems Engineering

Sep 2025 – May 2026

- Relevant Coursework: Data Analytics, Statistical Modeling, Machine Learning, Optimization

University of British Columbia

Vancouver, BC

Bachelor of Science: Major in Mathematics

Sep 2021 – June 2025

- Relevant Coursework: Relational Databases, Statistical Learning, Time Series Analysis, Inference, Algorithms & Data Structures, Linear Programming, Stochastic Calculus

EXPERIENCE

Institutional Sales Department Intern

May 2024 – Aug 2024

Grow Investment Group

Shanghai, China

- Supported institutional clients' due diligence on the firm by completing due diligence questionnaires (DDQs), cross-checking internal records to keep responses accurate and consistent
- Conducted quantitative market research integrating macroeconomic indicators, interest rate trends, and sentiment data; collaborated with senior analysts to deliver analytical reports supporting institutional investment decisions
- Produced convertible bond downturn analysis and product training materials; contributed to 9% fewer redemptions, 4% more inquiries, and 12% higher conversion rates

Investment Banking Intern

June 2023 – Aug 2023

Sinolink Securities Co., Ltd.

Shanghai, China

- Calculated Sharpe, Sortino, Beta, volatility, and correlation metrics; visualized trends against benchmarks in risk management reports for stakeholders
- Performed pre-IPO financial due diligence on a Shanghai main-board applicant (planned fundraising ~RMB 460M), cross-checking executives' 3-year bank statements against company ledgers to flag large unexplained transactions
- Refined data collection and reporting methodologies through close cross-functional collaboration, improving team operational efficiency by 8%

PROJECTS

Olist Marketplace Customer Retention & Fulfillment Analytics | *SQL, Python, Excel*

Jan 2026 – May 2026

- Built a DuckDB SQL analytics pipeline on 99K+ Olist marketplace orders, creating reusable marts for retention cohorts, revenue, fulfillment quality, customer segments, and seller/category performance
- Identified a 3.0% delivered-customer repeat rate and BRL 7.98M high-value one-time buyer opportunity; collaborated with project teammates to translate findings into CRM, retention, and category-management recommendations
- Analyzed 96K+ delivered orders to quantify an 8.1% late-delivery rate and lower review scores; produced reproducible CSV outputs and an Excel KPI dashboard for service recovery and seller operations

Diabetes 30-Day Readmission Risk Modeling | *Python, pandas, scikit-learn, XGBoost, SHAP*

Sep 2025 – Dec 2025

- Engineered a 160-feature clinical dataset from 101,766 hospital records across 130 U.S. hospitals; applied patient-level train-calibration-test splits to prevent data leakage
- Benchmarked Logistic Regression, Random Forest, Gradient Boosting, and XGBoost, achieving best test performance of AUROC 0.668 and AUPRC 0.230
- Applied isotonic recalibration to reduce ECE from 0.342 to 0.004; collaborated with the project team to translate SHAP and subgroup fairness findings into decision-ready insights

TECHNICAL SKILLS

Programming: Python (pandas, NumPy, scikit-learn, XGBoost, SHAP, Matplotlib), SQL (DuckDB), R, C++, MATLAB, LaTeX

Analytics: Cohort Analysis, KPI Dashboarding, Customer Segmentation, Statistical Modeling, Model Calibration, A/B Testing

Tools: Excel, Tableau, Git, Jupyter

Languages: Chinese (Fluent), English (Proficient), Japanese (Basic)
